

The HONORS IMPACT

Vision Statement

The Honors Program will cultivate the next generation of justice-oriented, critical, curious and creative thinkers and leaders with the knowledge, skills, abilities and commitment to have a positive impact on the world around them.

Close-Knit Community

Along with other Honors students, you'll quickly find yourself part of a great group of motivated peers and engaging faculty, drawn together by your love of learning and your desire to have a positive impact.

Active Learning

Honors students are not passive learners — they engage with the world in order to learn about it. Honors classes and programming help you develop into a thoughtful, creative, articulate and socially responsible citizen.

Preparing for Your Future

An Honors education positions you to impact the world around you both professionally and personally. Many of our graduates move directly into competitive graduate and professional programs, while others have their choice of job offers. No matter which path you choose, you'll be ready.

- Small Classes
- Faculty Mentoring
- Priority Class Registration
- Peer Network
- Travel Opportunities
